JOB TITLE: Technical Trainer (APAC)

LOCATION: Kuala Lumpur, Malaysia

Fortinet is looking for an energetic experienced trainer to join their Training Services Team. The successful candidate will be involved in delivering technical certification training to Fortinet customers and partners around the world, and will also assist in the development of training materials for traditional classroom training as well as web based and computer based training. This position requires extensive travel, in some cases on short notice.

Responsibilities include:

- Delivering classroom and web based training to audiences worldwide
- Delivering Train the Trainer sessions to other Fortinet Certified Trainers
- Design and development of training materials
- Assisting with training needs analysis on customer calls
- Acting as a subject matter expert in the training team for a set of Fortinet products
- Supporting other trainers within the Fortinet network of Authorized Training Centers

Required Experience:

- Extensive networking and security experience in areas such as routing protocols, HA, VPNs, firewalls, IPS, messaging protocols etc.
- Teaching experience and understanding of adult learning principles
- Development of formal technical training materials

Desired Experience:

- Delivery of web based training sessions to large audiences
- Development of CBT and WBT using appropriate tools such as Captivate, Camtasia, Authorware, etc.
- Experience teaching outside of North America
- Basic experience using FrameMaker

Education Requirement:

- University degree in engineering or computer science, or a technology diploma in a relevant field
- Industry certifications such as CISCO – CCIE, Fortinet – FCNSP etc. would be very beneficial

To apply, please send cover letter and resume to: Jobs_Vancouver@fortinet.com
